

## Slasher

With the 1.2 metre slasher we are able to tidy up long grass in paddocks, roadside and steep areas. As our unit is very manoeuvrable and compact, we can get in tight areas and under trees where the larger units can not. Both our tractors can handle steep slopes

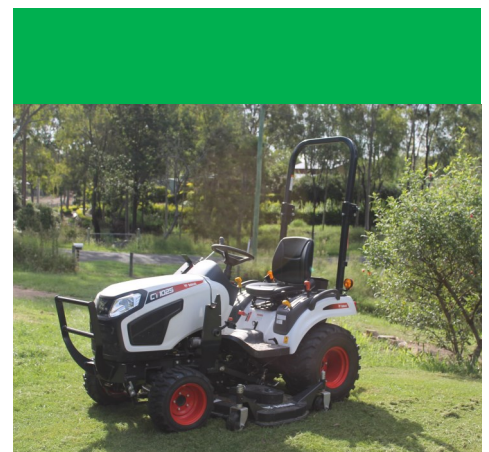

## Flail Mower

Mulching as it cuts, this mower is incredible for areas that haven't been cut for a while. It will tidy up neglected areas in no time. With a rear roller it leaves a very even finish and really shaves out clumping grasses like green panic and signal grasses

## Finishing Mower

Combined with the compact tractor this mower quickly cuts lawns, acreage and fields with an outstanding finish. Modified with a rear roller it gives a manicured cut and is capable of reaching under trees and areas where a zero turn can't. Lightweight and set up specifically to leave little if any marks.

## Mid Mount Mower

Coupled with the 26hp Bobcat compact tractor this unit is an outstanding performer. With the large 60 inch deck it is capable of mowing large areas very quickly. With 4WD and diff locks, it can get to a lot of places where zero turns fail.
